

VISION & GOALS FOR THE LAS VEGAS MEDICAL DISTRICT

Provide a permanent, centrally located, community oriented home for UNLV's fully accredited allopathic medical school.

Foster the University of Nevada School of Medicine's programs in Graduate Medical Education and training of residents and fellows, clinical and translational research, and multi-specialty clinical practice.

Support the UNLV School of Nursing, UNLV Department of Physical Therapy, and UNLV's School of Allied Health Sciences education and training programs.

Promote the continuing development of the UNLV School of Dental Medicine education, training, research and care enterprise.

Promote the continuing development of NSHE's state-of-the-art Clinical Simulation Center of Las Vegas, which currently supports clinical training for the UNLV and Nevada State College (NSC) Schools of Nursing, the University of Nevada School of Medicine (UNSOM) and, ultimately, the UNLV School of Medicine.

Create and expand on excellence in health care, research, education and training opportunities located within LVMD.

Encourage master planning that is attractive to patients, employees, students, residents and new businesses and institutions, with attractively landscaped streets, parks and open spaces

Adequate parking

Hotels for patients and visitors

Quality housing within or nearby for medical employees.

Restaurants, shops and gathering places.

Enhance connectivity to the region via mass transit and provide transit circulation within the LVMD.

Support UMC and Valley Hospital as they substantially expand as teaching hospitals and centers of medical excellence.

Encourage specialty hospitals and health care service providers to reside within LVMD, in affiliation with existing hospitals or as freestanding facilities.

Become established as the preferred location for all regional facilities and services of the highest quality specialties, particularly those where there is financial or market support for only a single venue.

Work with the Cleveland Clinic as it refines and promotes its presence on the Symphony Park campus.

Build and provide a regional and collaborative international patient center.

Generate a total annual economic impact of \$3 billion and employ 20,000 employees at an average annual wage in current dollars of \$80,000.
