

PLANNING COMMITTEE

The Planning Committee focuses on the long-range planning, logistics and development of the Las Vegas Medical District. This work includes implementation of the LVMD Facilities Master Plan to create a cohesive community for the district's future; as well as coordination of parking, signage, zoning and infrastructure as necessary. The committee is comprised of local stakeholders that have real estate interests in the district and members generally responsible for facilities, real estate and development who were appointed by their Advisory Council member.
